**Discipline :** Thermal - Temperature

**Calibration Results**

| Sr.No. | Set Point | DUC Reading | Master Instrument Reading | Error | Acceptance limit (±) | Expanded Uncertainty (±) | Compliance Status |
|--------|-----------|-------------|---------------------------|-------|----------------------|--------------------------|-------------------|
|--------|-----------|-------------|---------------------------|-------|----------------------|--------------------------|-------------------|

**Remarks :**

**The results comply with acceptance criteria.**

- "A seamless Payment Gateway, ensuring secure transactions, stands as a testament to efficiency and reliability."
- "Effortlessly processing transactions, our Payment Gateway exemplifies a harmonious blend of security, speed, and user-friendly functionality."
- "In the realm of digital transactions, our Payment Gateway shines, providing a robust platform that ensures smooth and reliable financial operations."
